Stable EBITDA in the third quarter

23 November 2026 - **ANY Security Printing Company's net revenue in the third quarter amounted to HUF 15 billion, export revenue amounted to HUF 7.5 billion.**

The Company generated revenue of HUF 48.2 billion in the first nine months of the year, HUF 6.9 billion lower than in the corresponding period of the previous year, with export amounted to HUF 23,1 billion. The decrease is mainly explained by the exceptionally high base value resulting from one-off large-scale projects, alongside the nearly 10% strengthening of the forint against the euro, which also unfavourably affected the revenue. Compared to the same period of the previous year, the revenue from sales in the segment of printed forms and traditional printed products increased, while the sales of card manufacturing and security products resulted in more moderate revenue. In the first 9 months of the year, the net profit reached HUF 5.6 billion, EBITDA was 21.3%, and earnings per share (EPS) was HUF 390.

"Stable operations in the third quarter as well. Combined with a balanced domestic market position, we have an intensive presence in export markets, supplying passports, visas, other paper-based security documents, forms, as well as custom security additives developed by our document security laboratory worldwide. Profitable operations remain our key objectives; the foundation of our long-term development is ensured by technological renewal, efficient operations, and innovative IT solutions supporting them. I am convinced that the knowledge we have accumulated in research and development, and our ability to adapt to changing market demands, lay the foundation for growth in the coming years," added Gábor Zsámboki, CEO of ANY Security Printing PLC., to the first nine months report of 2026.
