# Registration card for product identification

ANY Security Printing Company PLC (former State Printing Company) is the leading security printing company in the CEE region. The Company supports state administration in document and product protection projects from conception planning to production, as it has more decades of experience and references in document issuing.

Products and solutions include different fields, like personal identification – eID, passport, visa-, fight black economy – excise and tax stamps- or ballot printing. Numerous security solutions have been developed in its Document Security Laboratory, including security inks and paper additives, document printers and special document control devices. Currently the Company personalises and mails 50 types of documents. The Corporation's capabilities in the field of security technology and plastic card technology are demonstrated by references such as the Hungarian, Albanian and Icelandic driving licenses. The new Hungarian electronic ID cards that were launched on 1st January, 2016 are supplied by the consortium led by ANY PLC.

## WIDE RANGE OF COMPLEX SOLUTIONS

- consultancy in document issuing, design, project management
- complex equipment of document offices: supply of data collection kiosk, unique development, maintenance of security document printers, supply of special accessories
- production of document security products
- delivery of security solution for decentralised and centralised issuance of documents
- support for ICAO standards, biometrics and PKI
- control devices: development and supply of professional, desktop and mobile control devices
- full lifecycle management of issued documents
- know-how delivery for the set-up of a document production and personalisation facility as well as mobile document issuing units (for hard-to-reach areas)

## CHIP TECHNOLOGIES

ANY Security Printing Company develops eID solutions to the Client's needs. The ID1 sized documents can use contact or contactless technologies, or a mixture of them (hybrid or dual-interface types).

## PERSONALISATION

- laser engraving
- retransfer technology

## BEST PRACTICES, IDEAS FOR APPLICATION

### ▪ **Vehicle registration card**

A vehicle registration certificate is an official document providing proof of registration of a motor vehicle. It is used primarily by governments as a means of ensuring that all road vehicles are in the national vehicle register, but is also used as a form of law enforcement and to facilitate change of ownership when buying and selling a vehicle.

The vehicle registration card or certificate owning customer must be regarded as lawful owner. At the same time one valid document must belong to one vehicle only. Change of owner cannot be passed through the registry and documents without the vehicle registration card.

### ▪ **Product registration card**

for product identification of valuable products (diamonds, jewellery, weapons etc.)

### ▪ **Medical registration card**

for identification of implants for emergency cases

### ▪ **Assistance and assurance cards**

### ▪ **Services cards**
