

LIVE IN TRUST, WE SECURE YOUR MOMENTS SINCE 1851

production and personalisation system

VISA

production and personalisation system

ANY Security Printing Company has a diverse portfolio of products, among others in the range of documents used to identify citizens. Today's documents are both physical and digital data carriers with a range of security features and anti-counterfeiting protection, their decorative, colourful graphics also display national symbols in a country-specific way. But behind the spectacular exterior, we can hide the properties that guarantee the maximum security and tamper-proofness of our products.

We know that the creation of a new document is an extremely complex process, which requires joint reflection with the representatives of the relevant areas of public administration. Our comprehensive consultancy and complex production process has been trusted by over 50 countries around the world, which are all using at least one of ANY's products!

ANY PLC has the technological and professional background for the production and personalisation of e-Passports and visas. We offer fully ICAO 9303 compliant visa, carrying much more security elements than it is obligatory.

About the production

ANY PLC undertakes the whole design and manufacturing process with safe, closed technology and a certified and ratified safety and production-technology system. The documents with unique exclusive security solutions developed by our Document Security Laboratory are produced in an audited environment in accordance with the strictest data security regulations.

The know-how and experience of our experts enable us to provide a complete service from effective production of security documents including design, printing, up to end-products packaging and verification solution. In terms of security elements, the visas offered by our Company by far exceed the requirements of the ICAO 9303 (MRV) standard.

COMPLEX VISA ISSUING SYSTEM

fast, secure and traceable

The complex visa issuing system improves security and fastens the visa issuing process. It allows applicants to start their application via the internet. Authorities can track the entire process from application to visa issuance or refusal, the status of the visa stickers in the system and the details of the person intending to enter the country, the purpose of entry, the place of stay after entry.

The process of visa issuance using the system:

Main advantages of the system:

- The Information Portal is not only an online application platform but also provides full information on visas. It also allows online payment.
- Continuous communication between the applicant and the issuing body throughout the process: notification of the applicant about actions and events. Automatic notification when the visa expires.
- Smoother communication between the issuing body and the various public administrations. Visa priority approval option.
- The central register system allows the authorities concerned to keep track of visa applications received, visas issued and how many travellers are currently in the country and when they will have to leave.
- Complete register including visa history and discarded visa stickers, with continuous synchronisation.
- The system is able to issue a visa locally to the applicant in an express procedure and only synchronise with the central register afterwards.
- Border control system: the authenticity and validity of visas can be checked upon entry. The system stores queries from the border, entry, exit, possible visa revocation until the end of the visa validity period and then for the period required by law, so that these data can be retrieved if necessary, even for multiple entry visas.

ANY Security Printing Company PLC

About the Company

ANY Security Printing Company PLC was founded in 1851. The Company is one of the leader security printing companies and identity solution provider in the Central Eastern European region. Its head office is located in Budapest, Hungary. With more than 1000 employees in 4 countries at 9 premises, our goal is to make people's everyday life more secure and more comfortable. The Company's shares have been listed on the Budapest Stock Exchange in the premium category since 2005.

We do not only produce documents, we also provide secure personal identification, innovative product identification and data logistics in large volumes.

We specialise in delivering products and providing solutions for state administrations. These products and solutions provided for governments are varying on numerous fields: identity cards (residence permit, refugee card, driving licence, student card, voter's card), paper based documents such as passports, breeder documents and visas for personal identification, ballot printing, excise and tax stamps as a fight against shadow economy. ANY PLC offers modular products and complex services in the process of document issuing. Our references, special technology, security preparedness, more than 170 years of experience and 11 domestic and international certificates guarantee that we can offer the best possible products for our Customers.

At ANY Security Printing Company PLC we believe in taking a comprehensive approach to security. That is why we strive to provide secure, durable and innovative solutions.
