

The Printing Company has grown stronger in foreign markets

May 14, 2025 – The Any Security Printing Company has reached HUF 23,5 billion of net revenue in the first quarter. The result of the first three months is HUF 3951 million.

There is significant growth compared to last year, particularly in the product group of security products and solutions. Export revenue in the first quarter exceeded HUF 17 billion, it is a substantial increase compared to the first three months of the previous year: HUF 6,7 billion more than the basis period. The consolidated EBITDA is HUF 6,034 million, the operating profit is HUF 5,413 million.

„In the first quarter, the export sales ratio within total revenue was 73%. The most important strategic objective of the past decade has been to succeed in foreign markets with unique technology. The export share has consistently increased, and we hope that this trend will continue in the future. This does not mean that we will approach 73% for the entire year, but we are hopeful that the dynamism of export growth will not decline. These results were, of course, made possible by the expertise and commitment of our employees, whose efforts truly deserve recognition. Moreover, technological advancements are constantly being made in the daily operations of the Printing Company.” - added in his first-quarter report for 2025 Gábor Zsámboki, CEO of ANY Security Printing Company PLC.
